

Solving Library Seating Shortages

Group:sales

Our Project

This project looks at the shortage of quiet study spots on campus. During midterms and finals, many students have a hard time finding a good place to focus, which can be stressful and make studying less effective.

The goal is to raise awareness about this issue and explore simple, practical ways to make study areas easier to access, more comfortable, and better for learning. By trying out small changes, we hope to make studying on campus a bit less stressful and a lot more productive for everyone.

Getahun, Hanna. (2021) *“The race for space: How today’s crowded study environments could affect college students’ performance.”* Call Matters.

Our plan

Our plan was to spread awareness about underutilized learning spaces by printing and posting fliers and posting them around campus.

5 PLACES TO STUDY OUTSIDE THE LIBRARY

1

Writing & Reading Center

Located in RLC, Writing & Reading Center is opened for a public study space.

2

SC Silence Study Room

In SC 2nd floor there are two silence study rooms.

3

3rd Floor of SH

3rd floor of Salish Hall (SH) has a study place with a good view.

4

TT Building

There is an open study space on the first floor of the TT Building across from the bus stop in front of SU.

5

Computer Lab in TC

2nd floor of Technology Center (TC) there is a computer lab and open study spaces.

SALES

Cedar Hall

Salish hall

We put up fliers on various boards around campus.

Technology Center

Science Center

RESULT/OUTCOME

- More students used empty classrooms as study spaces
- Reduced crowding in the library during busy times
- Students can find quieter places to focus
- Lower stress and better concentration
- Simple, low-cost solution using existing resources

Thank you for listening!
